Practical 0

Set up Scala and SBT on your system.

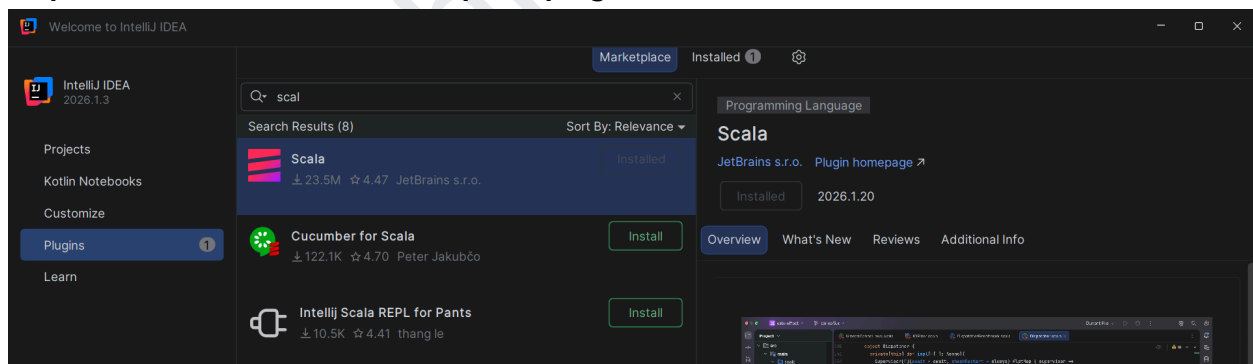

Step 1: install IntelliJ IDEA

Step 2: Set up IntelliJ Idea

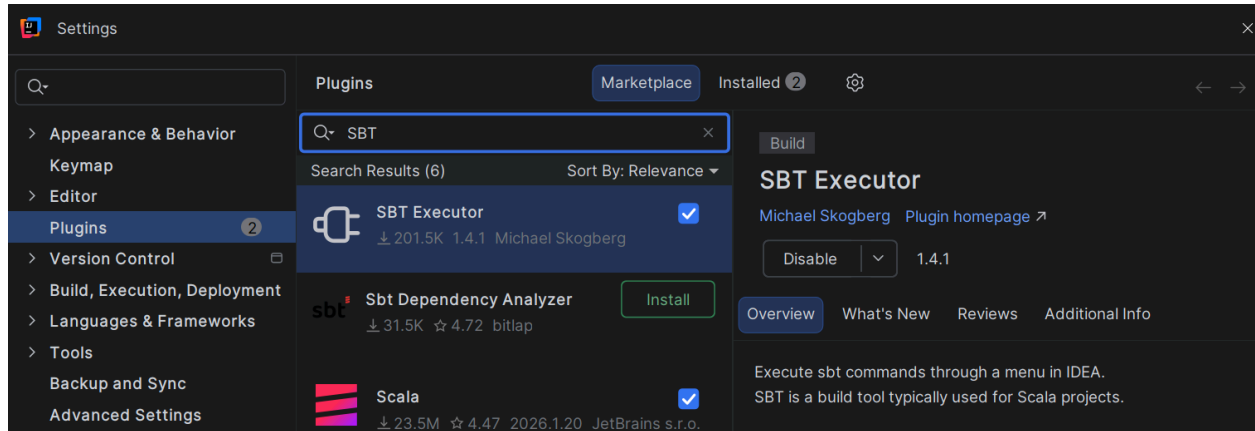

Step 3: Install scala form marketplace plugin

Step 4: Install SBT Executer from Marketplace Plugin

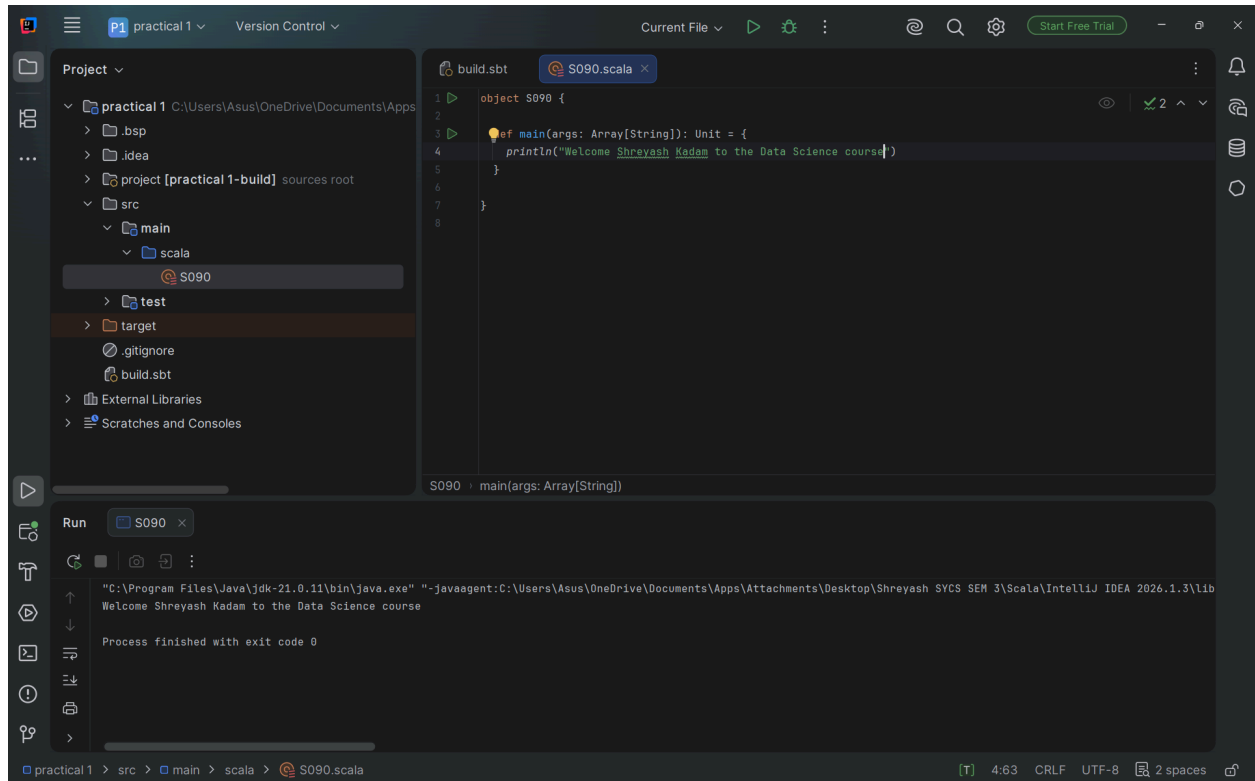

MVLU COLLEGE

MVLU COLLEGE

Practical 1

Write a simple Scala program that prints a welcome message for data scientists.

The screenshot shows an IDE with a project named 'practical 1'. The project structure includes a 'src' directory with a 'main' subdirectory containing a 'scala' subdirectory. The 'S090.scala' file is open, showing the following code:

```
1 object S090 {  
2  
3   def main(args: Array[String]): Unit = {  
4     println("Welcome Shreyash Kadam to the Data Science course")  
5   }  
6  
7 }  
8
```

The Run console shows the command executed: `"C:\Program Files\Java\jdk-21.0.11\bin\java.exe" "-javaagent:C:\Users\Asus\OneDrive\Documents\Apps\Attachments\Desktop\Shreyash SYCS SEM 3\Scala\IntelliJ IDEA 2026.1.3\lib"`. The output is: `Welcome Shreyash Kadam to the Data Science course`. The process finished with exit code 0.

Shreyash Kadam
